unified field mechanics the topic of the 9th international symposium honoring noted french mathematical physicist jean pierre vigier cannot be considered highly speculative as a myopic critic might surmise the 8th vigier symposium proceedings the physics of reality should in fact be touted as a companion volume because of its dramatic theoretical field mechanics in additional dimensionality many still consider the planck scale zero point field stochastic quantum foam as the basement of reality this could only be considered true under the limitations of the copenhagen interpretation of quantum theory as we enter the next regime of unified field mechanics we now know that the energy dependent einstein minkowski manifold called spacetime has a finite radius beyond which a large scale multiverse beckons so far a battery of 14 experiments has been designed to falsify the model when the 1st is successfully performed a revolution in natural science will occur this volume strengthens and expands the theoretical and experimental basis for that immanent new age

on 14 september 2015 after 50 years of searching gravitational waves were detected for the first time and astronomy changed for ever until then investigation of the universe had depended on electromagnetic radiation visible light radio x rays and the rest but gravitational waves ripples in the fabric of space and time are unrelenting passing through barriers that stop light dead at the two 4 kilometre long ligo observatories in the us scientists developed incredibly sensitive detectors capable of spotting a movement 100 times smaller than the nucleus of an atom in 2015 they spotted the ripples produced by two black holes spiralling into each other setting spacetime quivering this was the first time black holes had ever been directly detected and it promises far more for the

future of astronomy brian clegg presents a compelling story of human technical endeavour and a new powerful path to understand the workings of the universe
